**NOMACORC ISSUES FIRST CORPORATE SOCIAL RESPONSIBILITY REPORT**  
*Report Outlines Company's Commitment to Sustainability,  
Sets Goals for Future Progress*

**ZEBULON, N.C. (August 15, 2012)** – Nomacorc, the world's largest producer of synthetic wine closures, today issued its 2011 Corporate Social Responsibility (CSR) report, detailing the company's environmental, economic and social performance. This is Nomacorc's first CSR report, which outlines the company's existing social commitment and sets targets for continuous improvement.

"Since Nomacorc's inception in 1999, our driving force has been to build a better wine closure and produce it in a smart, efficient way," said Lars von Kantzow, president & CEO, Nomacorc LLC. "This vision is central to our operating principles, which have enabled us to minimize energy consumption and reduce our impact on the environment. By developing this CSR report, we are now able to benchmark our environmental, social and economic performance, and have a greater understanding of the opportunities for improvement in 2012 and beyond."

Nomacorc's CSR report outlines the company's approach to sustainability through three main guiding principles:

- **Sustainable Products & Ethical Conduct**, which includes Nomacorc's commitment to improvement in operations and company culture to minimize its impact on the environment.
- **Product Quality and Customer Service**, which includes Nomacorc's dedication to developing innovative wine closures that offer the best possible wine preservation performance and provide superior service to its valuable customers.
- **Motivated and Safe Employees**, by providing a safe workplace and a culture that fosters motivated and engaged associates.

"At Nomacorc, we truly believe that what gets measured gets changed," continued von Kantzow. "Our passion is to keep getting better and setting measurable goals for future progress."

In developing its CSR report, Nomacorc consulted with third-party firm Clean Agency to ensure that the report conforms to the Global Reporting Initiative (GRI) reporting guidelines, which provides a framework for reporting and tracking progress.

### **About Nomacorc**

Nomacorc is a worldwide leader in wine closures and the No. 1 closure brand for still wines in many countries including France, Germany and the United States. Dedicated to technological innovation, Nomacorc manufactures its portfolio of products using a patented co-extrusion process. As a result, Nomacorc closures provide consistent, predictable oxygen management and protect against off-flavors due to oxidation, reduction or cork taint. Nomacorc's 100 percent recyclable products are available through a vast network of distributors and sales agents on six continents. With 500 employees worldwide and state-of-the-art manufacturing facilities in the United States, Belgium and China, Nomacorc produces more than 2 billion closures annually. Working with renowned wine research institutes worldwide, the company leads the wine closure industry in fundamental and applied research into oxygen management in wine.
